Webinar lasts 60
minutes.

FREE UHPLC-MS AUTOMATION WEBINAR ON 8/18 & 8/26

LEAP is holding a free webinar to introduce the new UHPLC-MS Automation Package for Analyst™ (AB Sciex). The combination of Pump and Autosampler called “Flex-a-PAL” beats others with reliability, flexibility and convenience. Combine the LEAP PAL with the FX-15 UHPLC pump and be set for years to come.

LEAP offers both the complete system or the pump as add-on. The

flexibilities of the FX-15 UHPLC binary pump with a pressure range up to 18,000 psi and a flow rate of up to 5ml/min is suitable for all types of columns. If you use small particle columns only for part of your LC-MS methods it is easy to change to more traditional columns you can use the Flex-a-PAL system to do this automatically without opening any solvent lines.

Who should attend?

- Lab personnel interested in increased LC-MS productivity
- Analysts looking for flexibility to go from traditional LC-MS to UHPLC-MS and back in a breeze
- Anyone using LEAP PALs and CTC PALs with a AB Sciex MS system running under Analyst

What will you learn?

- A true alternative to your stacked LC type system
- Single Brand name systems vs carefully selected and integrated state of the art modules
- How an LC-MS front-end system containing a PAL can be upgraded and become a UHPLC-MS
